App signing

App signing by Google Play enables you to upload Android App Bundles and benefit from Google Play's dynamic delivery. [Learn more](#)

Please ask the account owner to grant you access. The contact email address is rmetcalfe15@gmail.com.

Android App Bundles and APKs to add

These app bundles and APKs will be served in the Google Play Store after the rollout of this release.

ADD FROM LIBRARY

Upload failed

You uploaded a debuggable APK or Android App Bundle. For security reasons you need to disable debugging before it can be published in Google Play. [Learn more about debuggable APKs or Android App Bundles](#).

You uploaded an APK that is signed with a different certificate to your previous APKs. You must use the same certificate. Your existing APKs are signed with the certificate(s) with fingerprint(s):

[SHA1: E] [B]

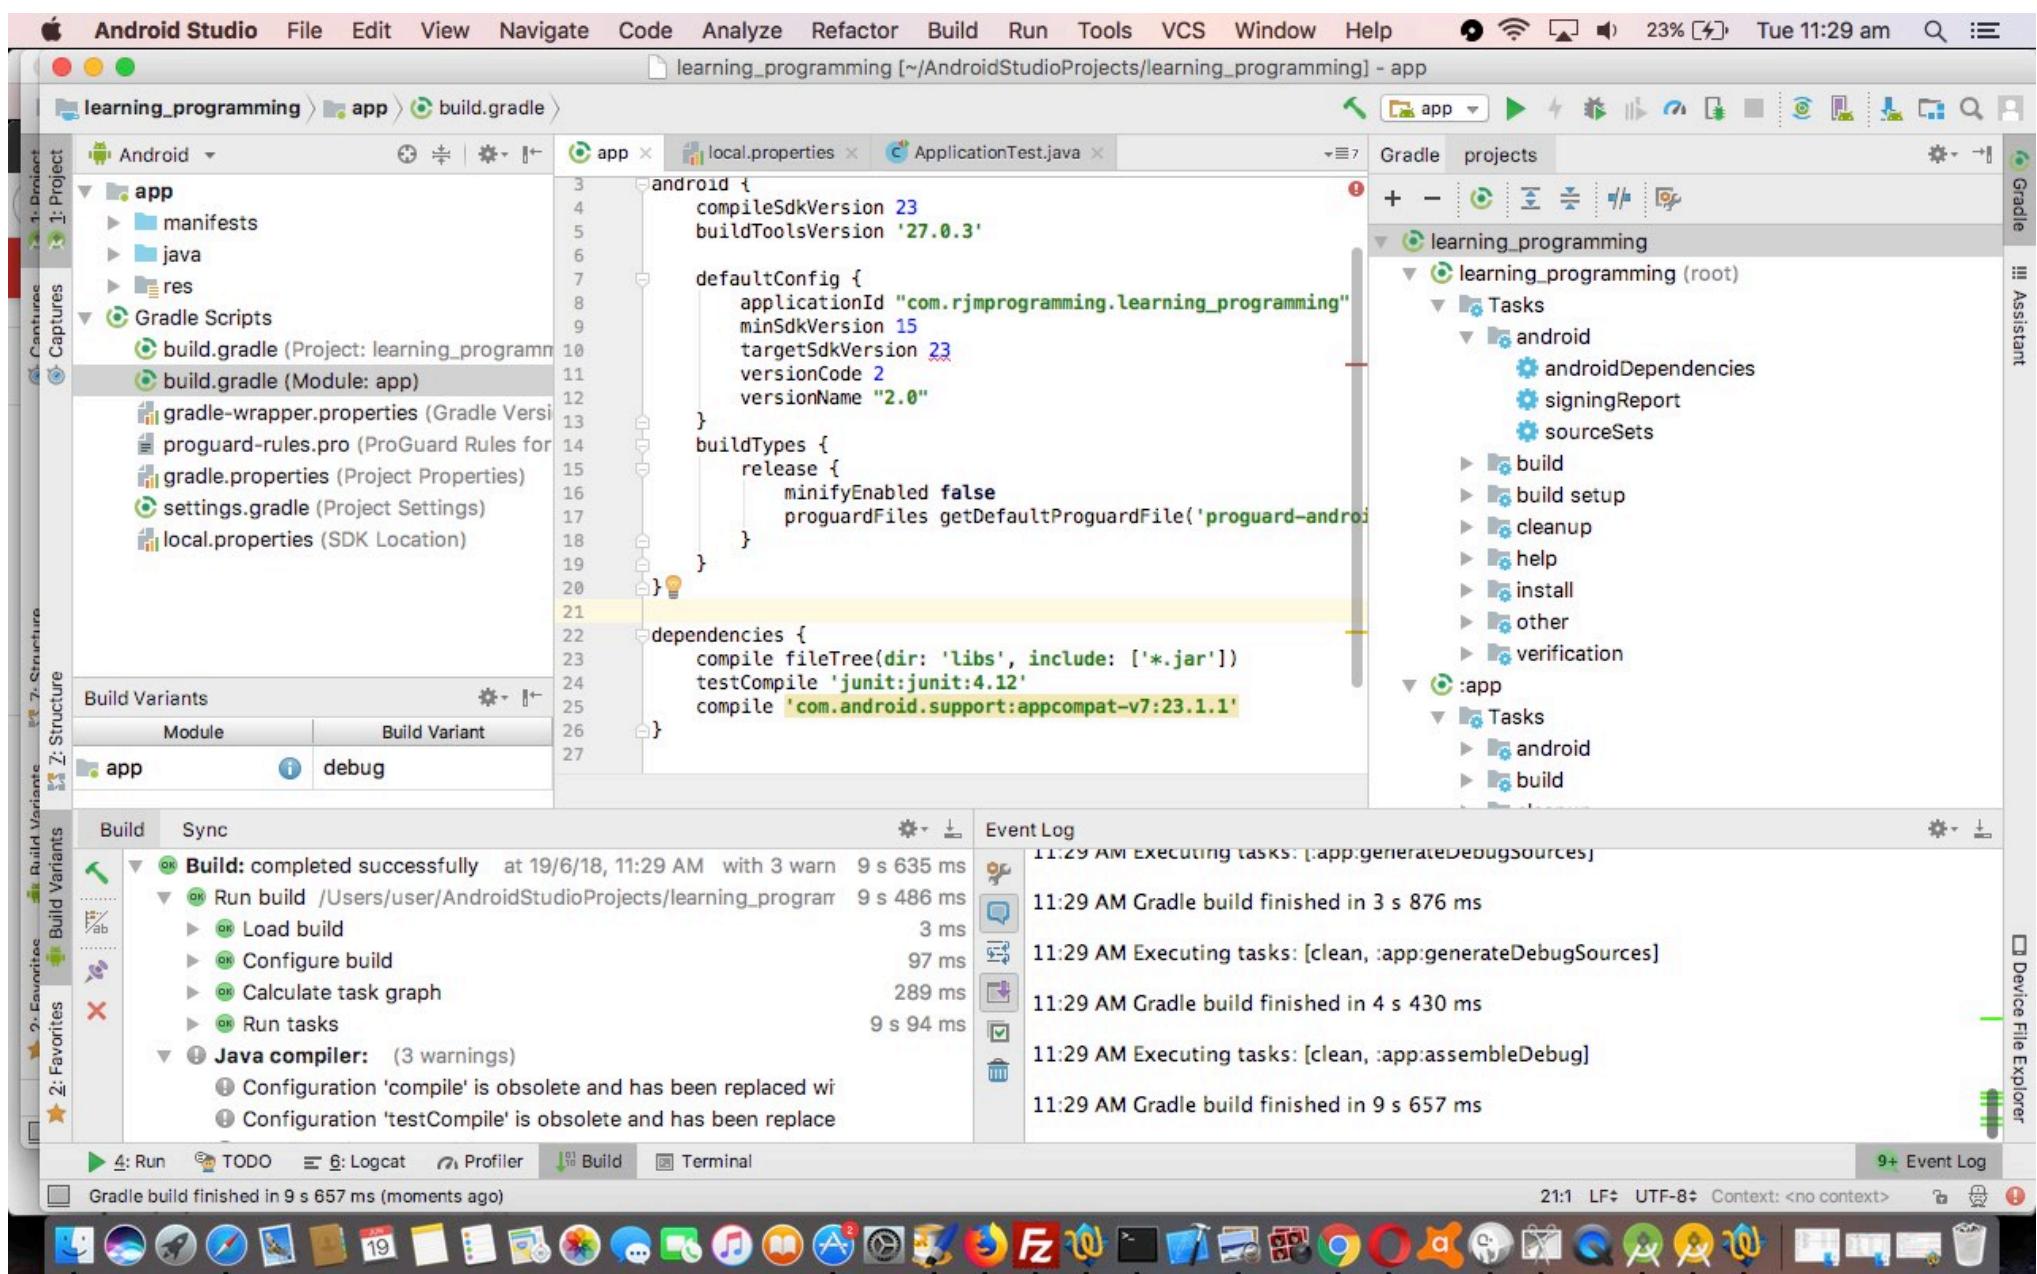

and the certificate(s) used to sign the APK you uploaded have fingerprint(s):

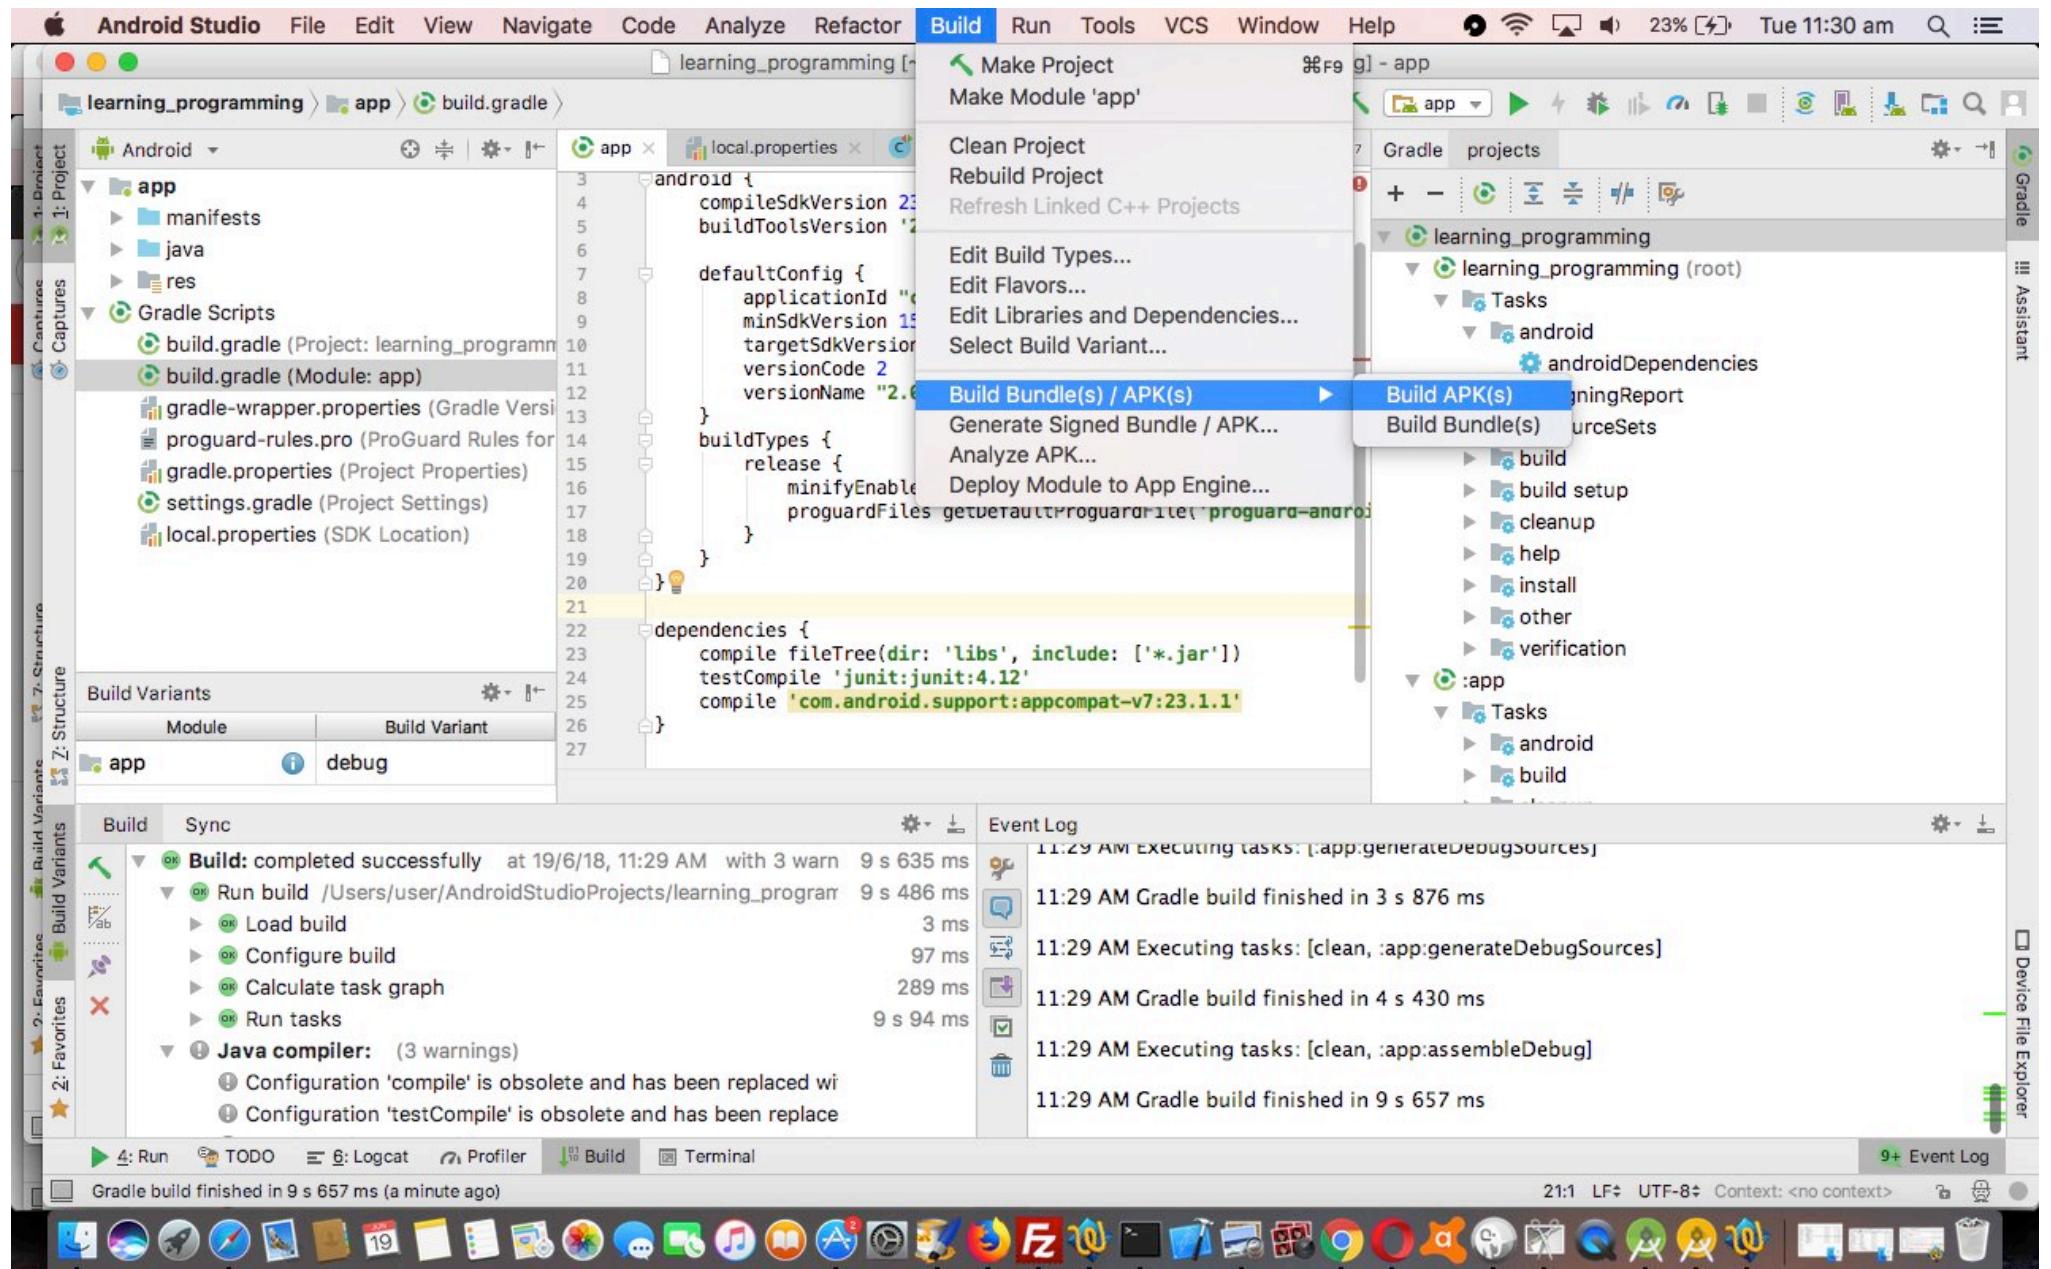

[SHA1: 2] [E]

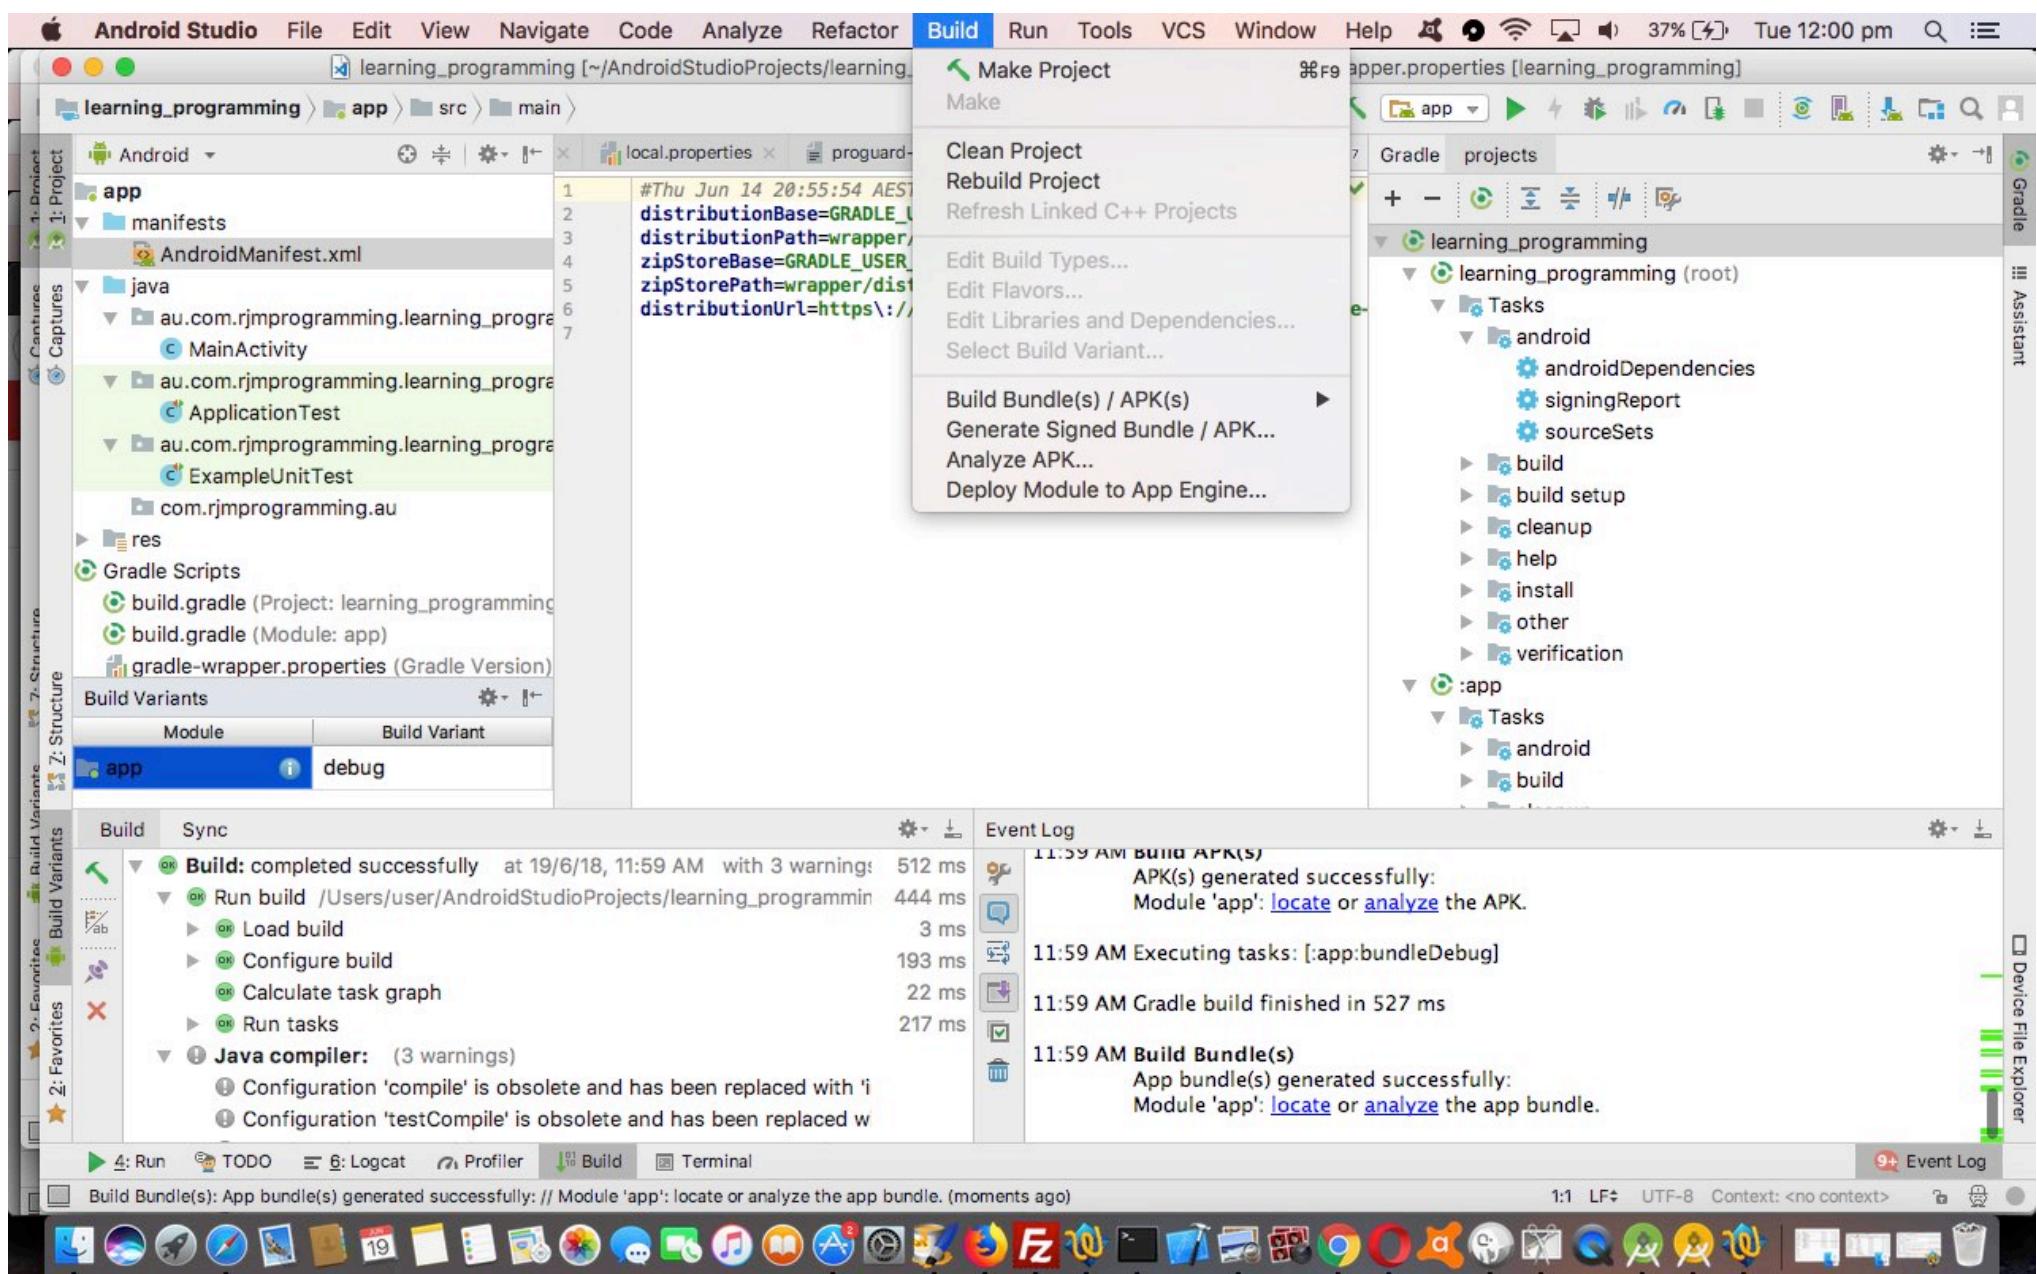

You need to use a different version code for your APK or Android App Bundle because you already have one with version code 1.

CREATE RELEASE

The screenshot shows the Google Play Console interface on a Mac OS X desktop. The left sidebar contains navigation links for the Google Play Console, including 'All applications', 'Dashboard', 'Statistics', 'Android vitals', 'Development tools', 'Release management', 'Release dashboard', 'App releases' (which is currently selected), 'Android Instant Apps', 'Artifact library', 'Device catalog', and 'App signing'. The main content area is titled 'App releases' and shows the 'Production' track. It displays a release for 'Learning Programming Quiz' (version 4.0) which was uploaded 2 minutes ago and has a 'Full rollout'. There is a section for 'Rollout history' showing the same 'Full rollout' entry. Below this, there is a 'What's new in this release?' section with a note about adding release notes. The 'Android App Bundles and APKs' section lists one APK added, with details: Type: APK, Version code: 4, Uploaded: Today, 2:21 PM, Installed APK Size: 1.03 MB, and Installs on active devices: No data. The top of the screen shows the Firefox browser window with multiple tabs open, and the Mac OS X dock is visible at the bottom.
