Tools
Press This
Press This is a bookmarklet: a little app that runs in your browser and lets you grab bits of the web.
Use Press This to clip text, images and videos from any web page. Then edit and add more straight from Press This before you save or publish it in a post on your site.
Drag-and-drop the following link to your bookmarks bar or right click it and add it to your favorites for a posting shortcut.
Press This
Categories and Tags Converter
If you want to convert your categories to tags (or vice versa), use the Categories and Tags Converter available from the Import screen.
Thank you for creating with WordPress.

WordPress 4.7 is available! Please update now.
Export
When you click the button below WordPress will create an XML file for you to save to your computer.
This format, which we call WordPress eXtended RSS or WXR, will contain your posts, pages, comments, custom fields, categories, and tags.
Once you've saved the download file, you can use the Import function in another WordPress installation to import the content from this site.
Choose what to export
All content
This will contain all of your posts, pages, comments, custom fields, terms, navigation menus and custom posts.

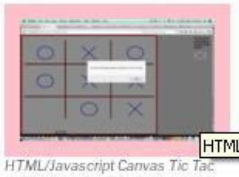
HTML/Javascript Canvas Tic Tac Toe Game Drag and Drop Tutorial



HTML/Javascript Canvas Tic Tac Toe Game Drag and Drop Tutorial

The Canvas HTML element tag can be used as the container to draw graphics on the fly usually via the use of Javascript functions for rendering and event management.

In today's tutorial we show some image Drag and Drop functionality that you can use with the Canvas HTML5 element where we create a Tic Tac Toe game webpage. We thank w3schools for the great advice at this link.

The Drag and Drop does not work well on tablets, but for own Tic Tac ther a drag and drop approach, or a
