Action Needed: iOS Distribution Certificate Expires in 30 Days

Message 3 of 2141

From: Apple Developer
To: rmetcalfe@rjmprogramming.com.au
Reply-To: developer@email.apple.com
Date: Wed 21:52

Your iOS Distribution Certificate will no longer be valid in 30 days. To generate a new certificate, sign in and visit [Certificates, Identifiers & Profiles](#).

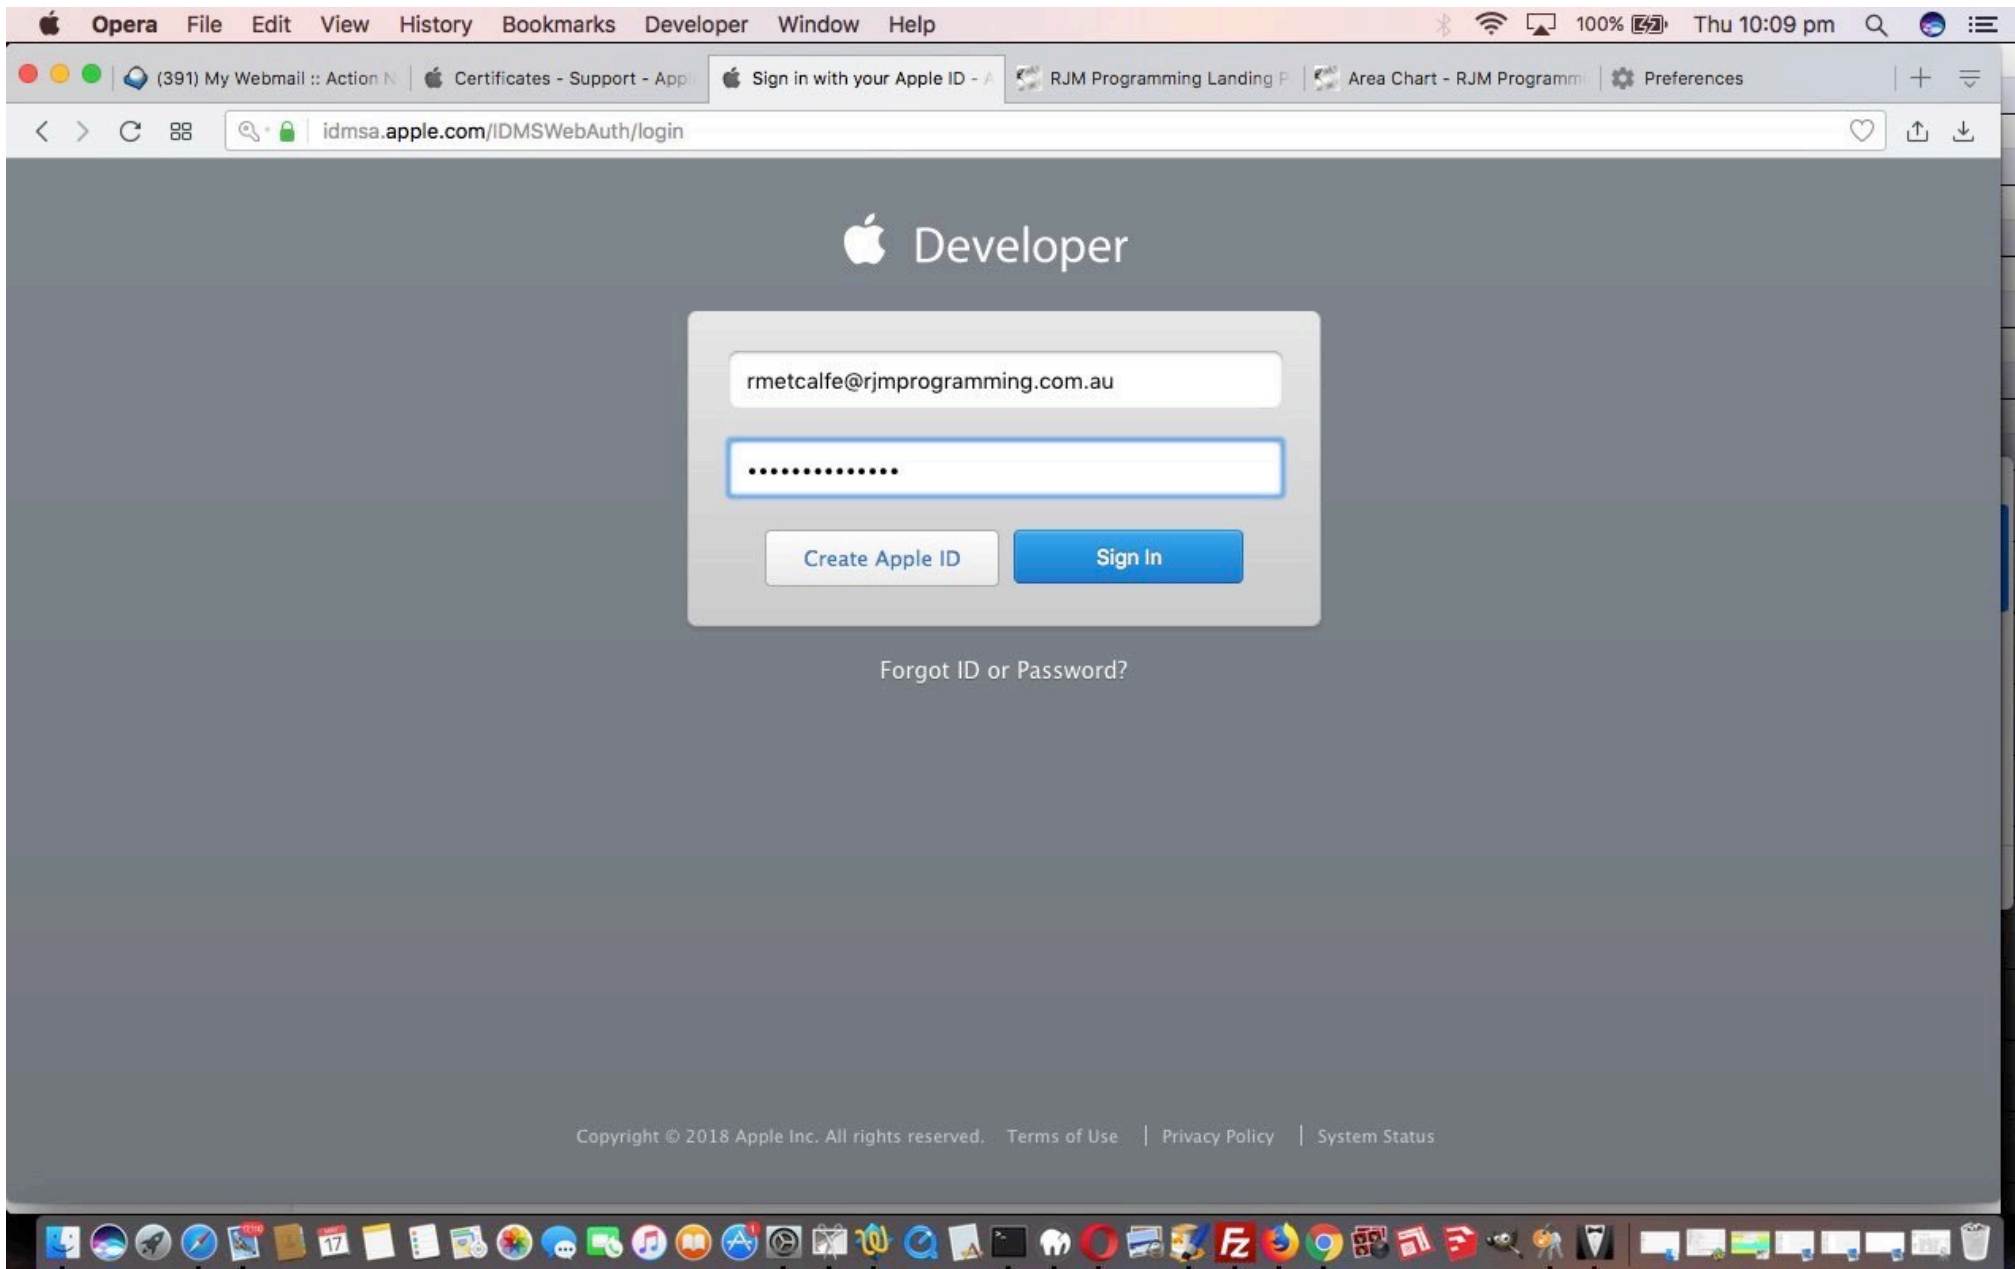

Certificate: iOS Distribution
Team ID: [REDACTED]

To learn more about expired certificates, visit the [certificates support page](#).

Best regards,
Apple Developer Program Support

Development

Distribution

What type of certificate do you need?

Development

iOS App Development

Sign development versions of your iOS app.

Apple Push Notification service SSL (Sandbox)

Establish connectivity between your notification server and the Apple Push Notification service sandbox environment to deliver remote notifications to your app. A separate certificate is required for each app you develop.

Production

App Store and Ad Hoc

Sign your iOS app for submission to the App Store or for Ad Hoc distribution.

Apple Push Notification service SSL (Sandbox & Production)

Establish connectivity between your notification server, the Apple Push Notification service sandbox, and production environments to deliver remote notifications to your app. When utilizing HTTP/2, the same certificate can be used to deliver app notifications, update ClockKit complication data, and alert background VoIP apps of incoming activity. A separate certificate is required for each app you distribute.

Pass Type ID Certificate

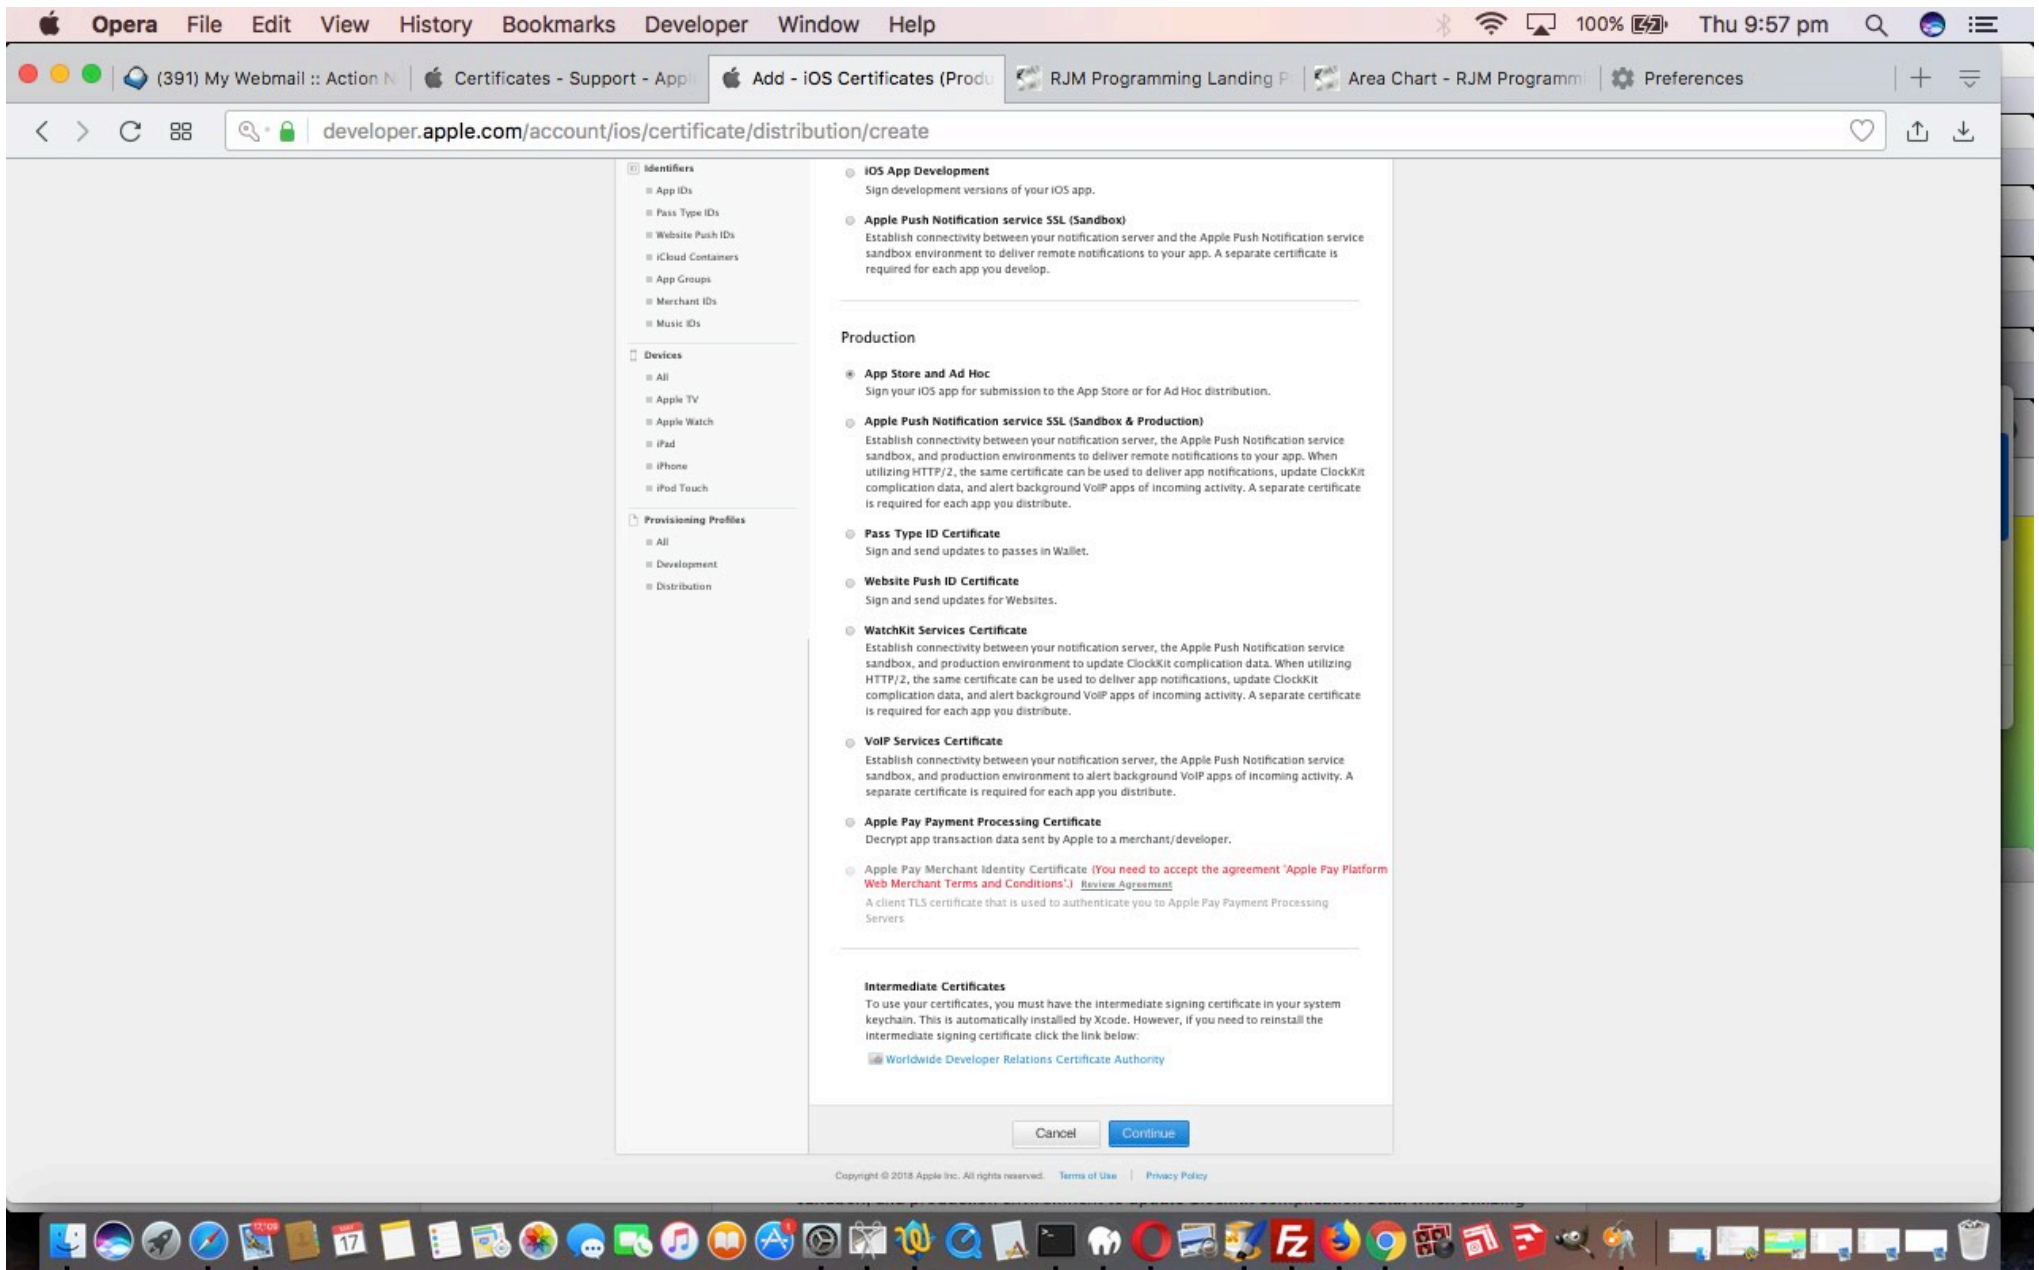

Sign and send updates to passes in Wallet.

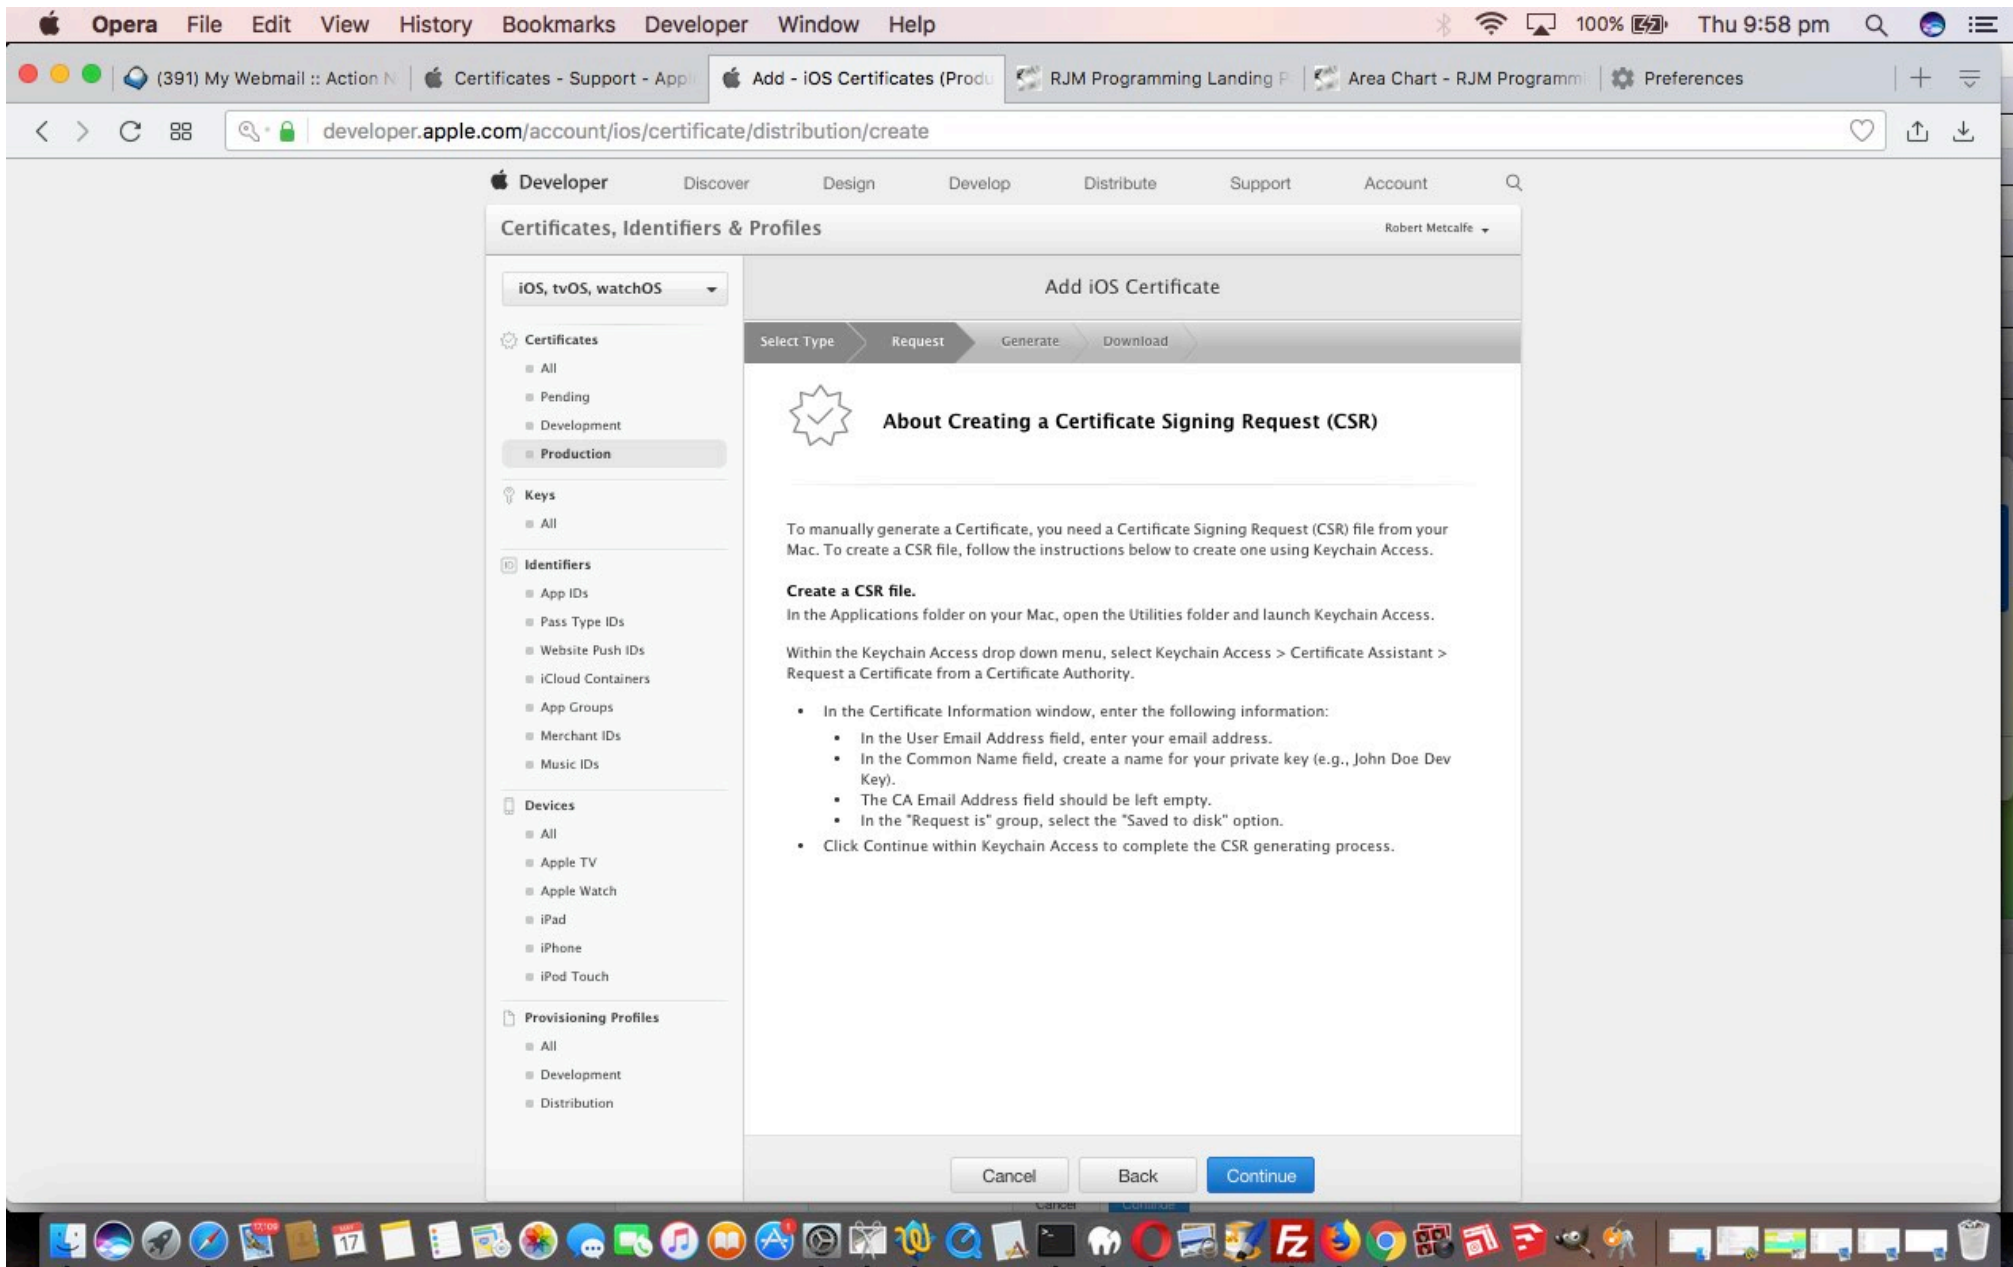

Website Push ID Certificate

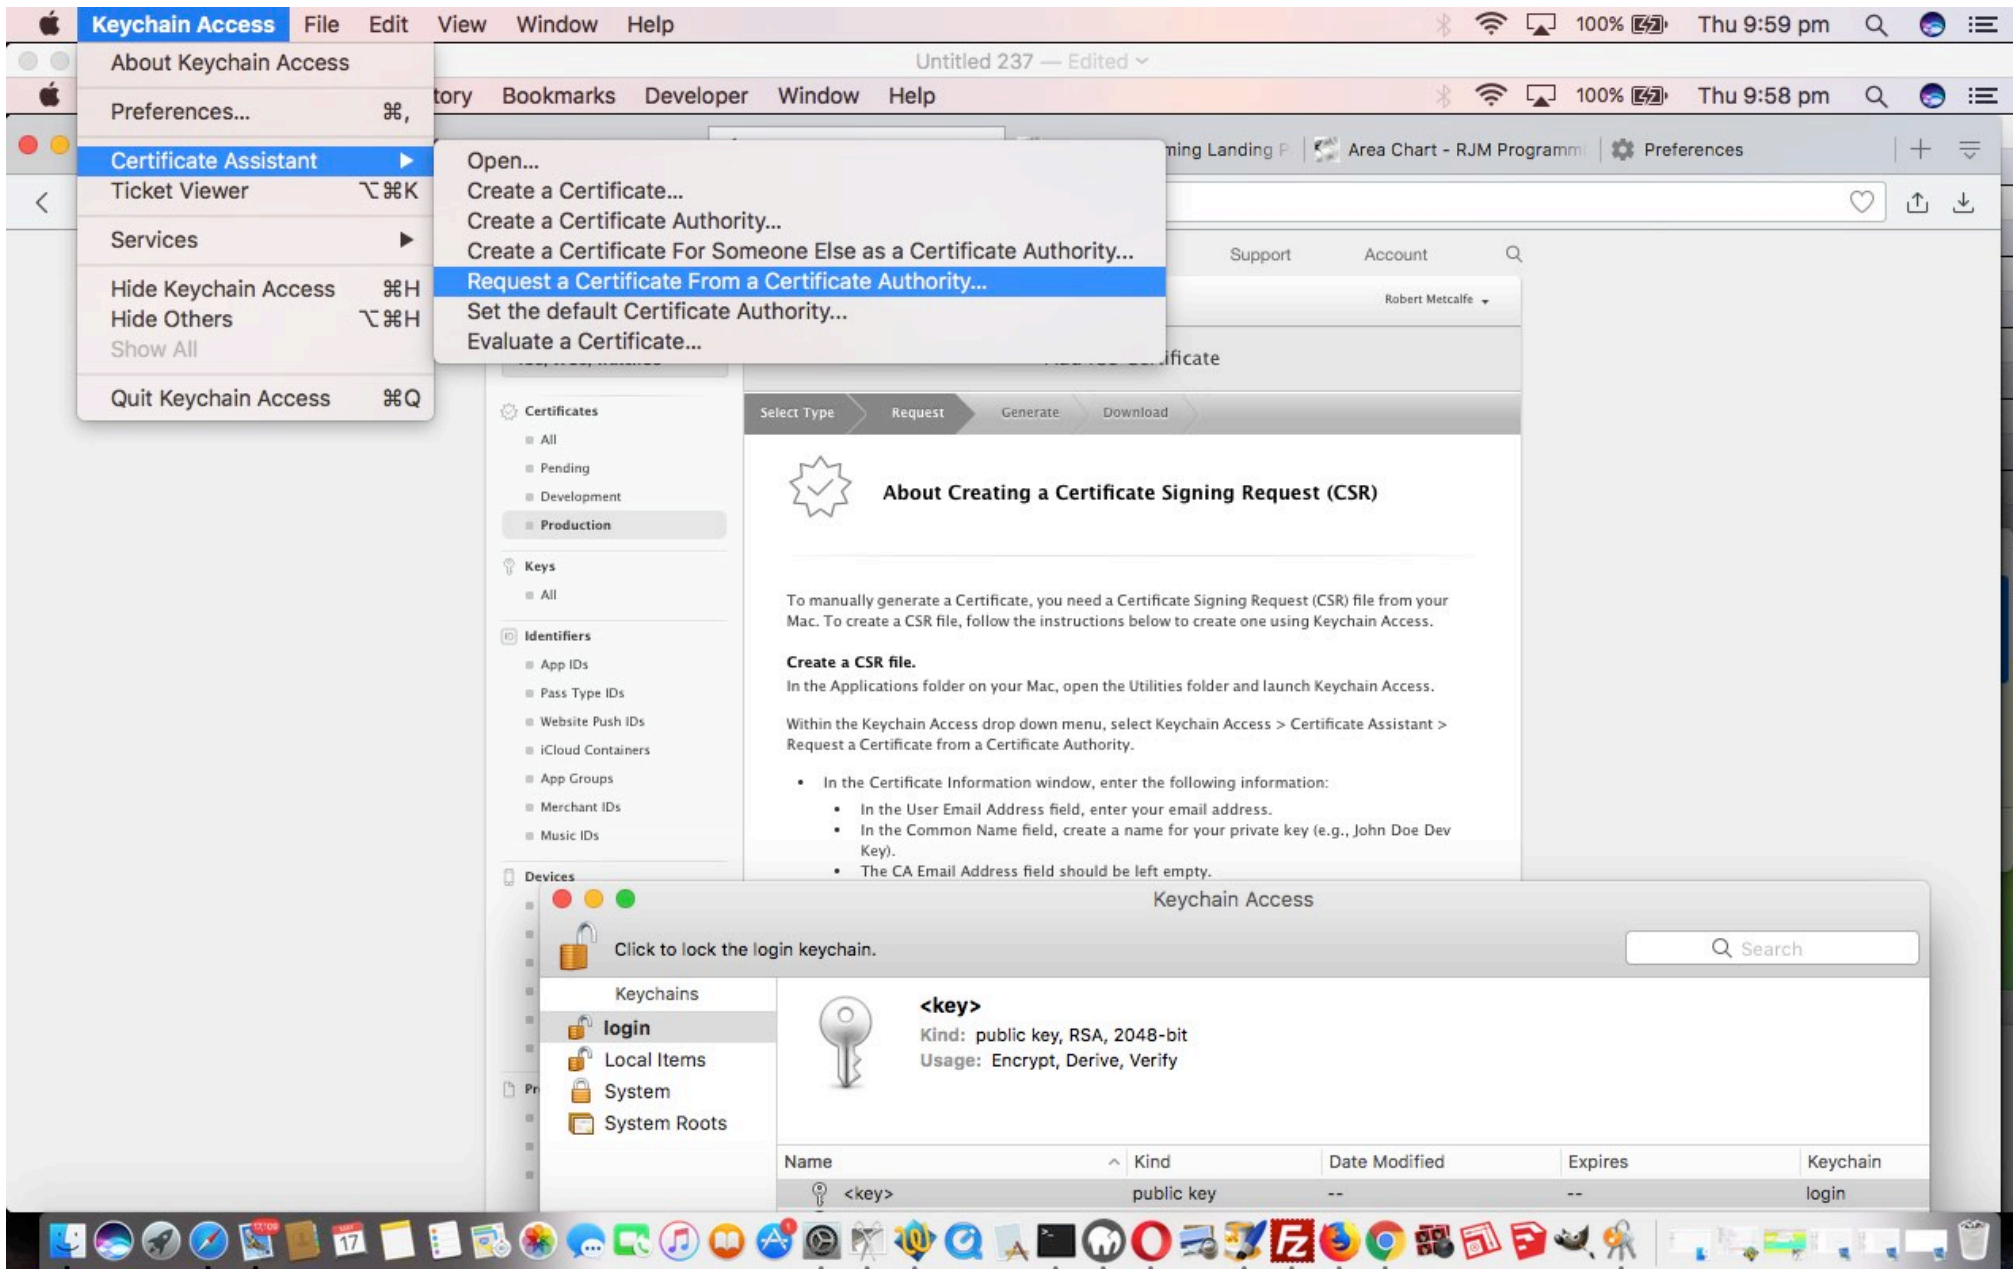

Sign and send updates for Websites.

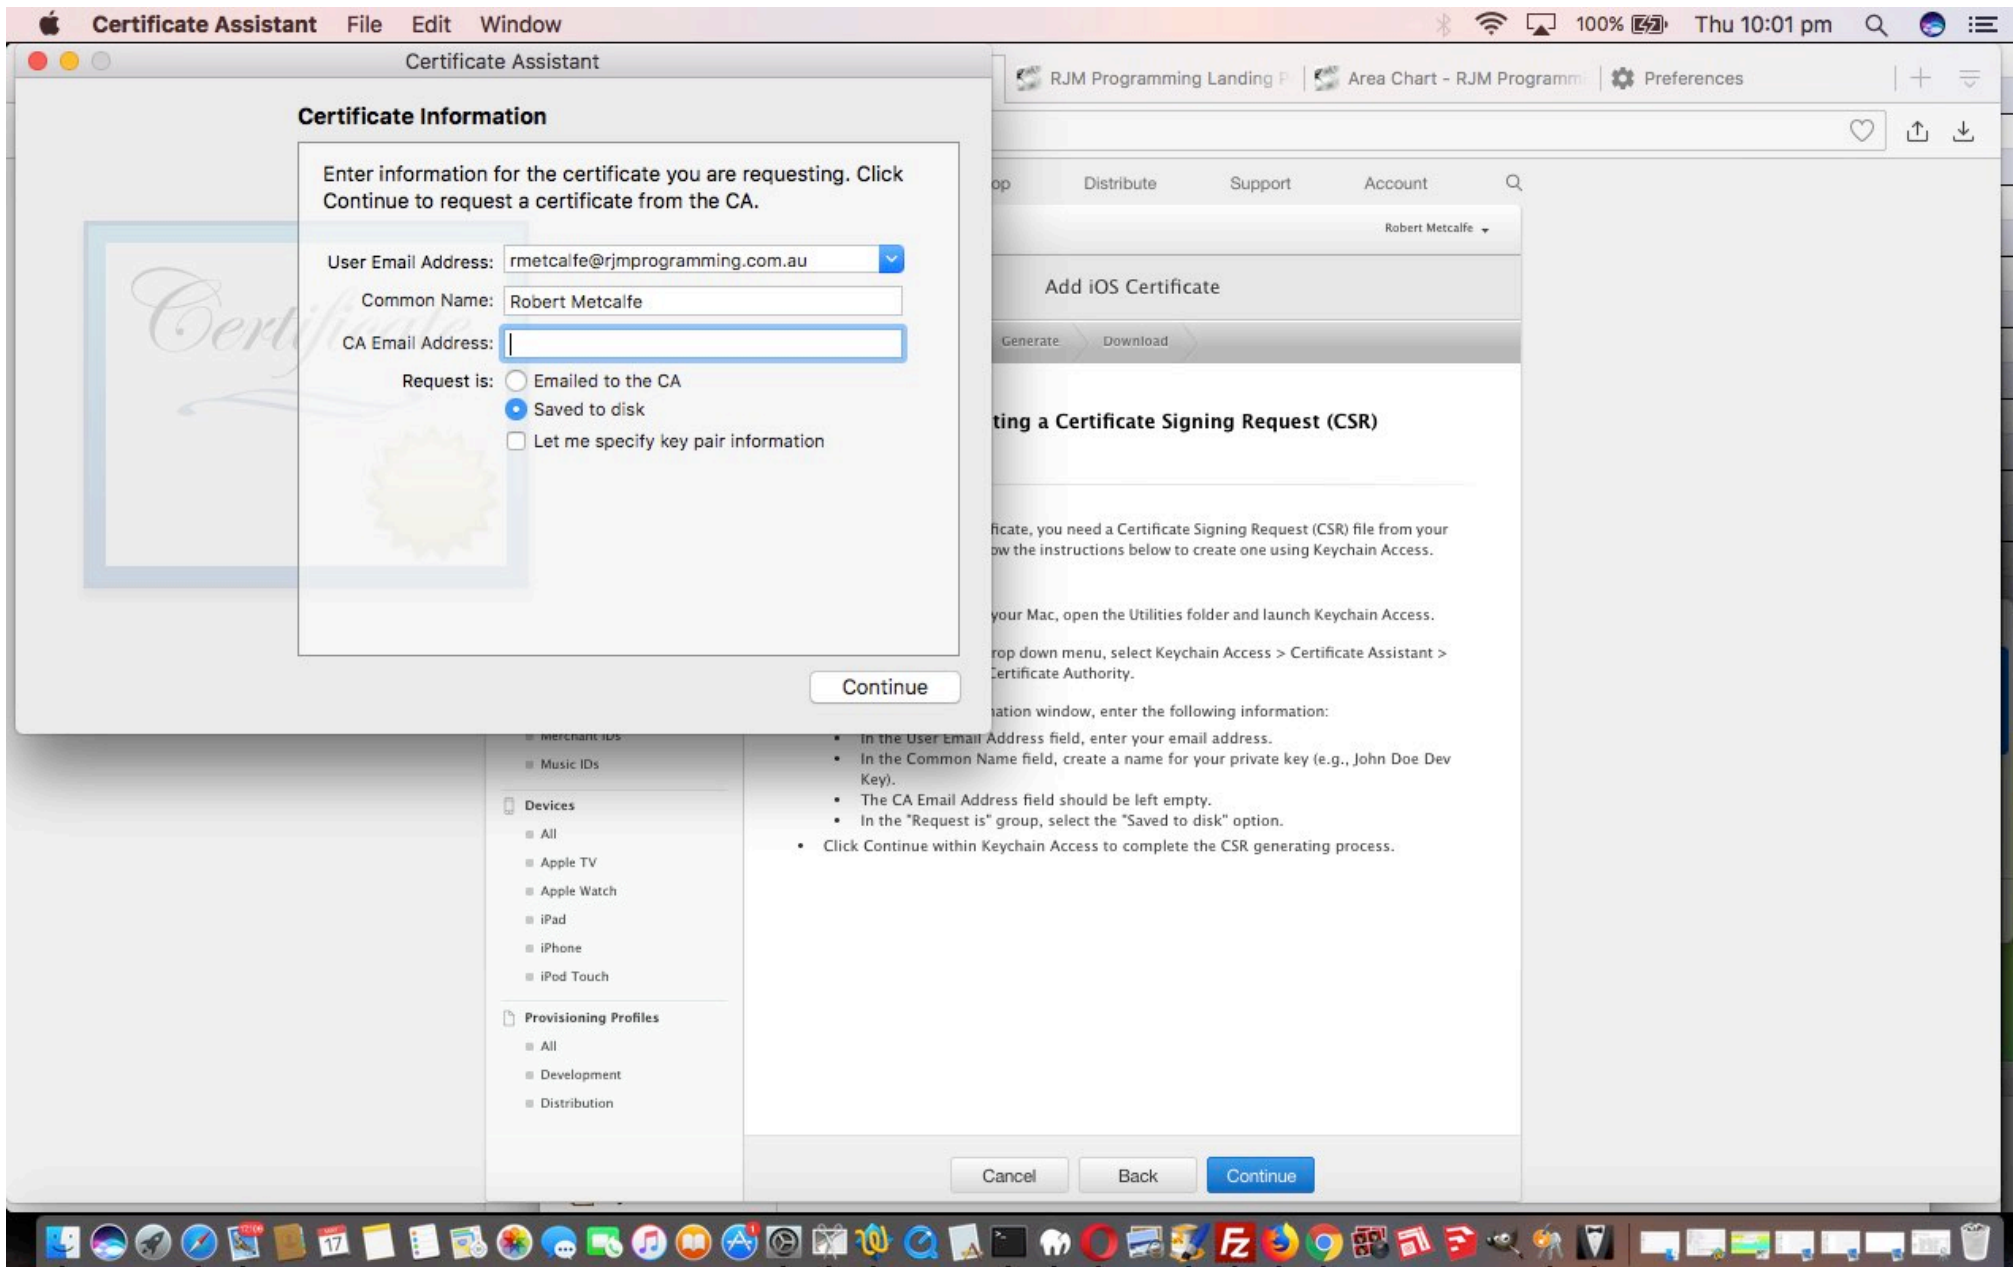

WatchKit Services Certificate

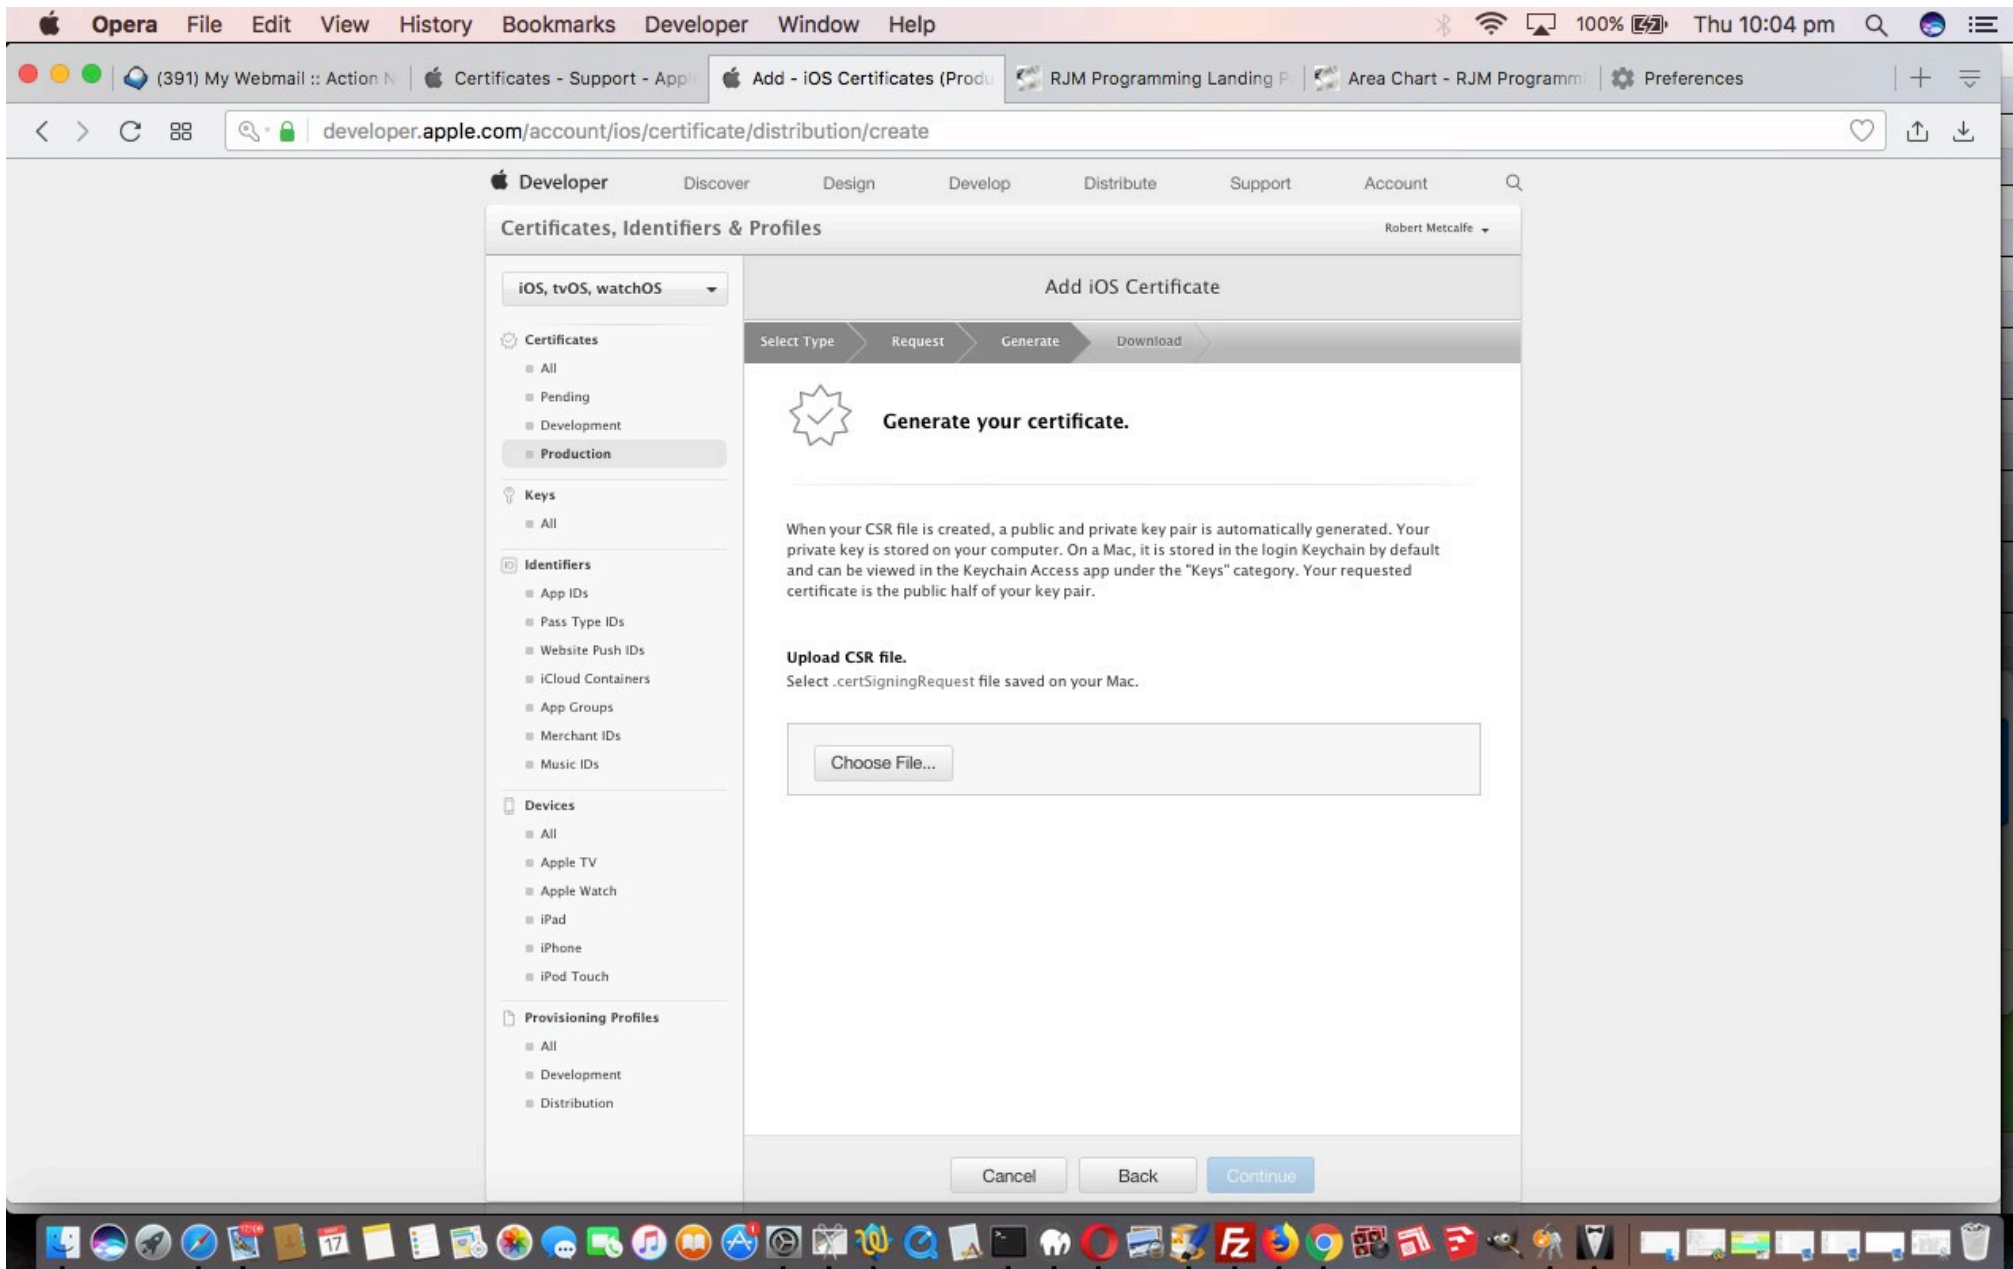

Establish connectivity between your notification server, the Apple Push Notification service sandbox, and production environment to update ClockKit complication data. When utilizing HTTP/2, the same certificate can be used to deliver app notifications, update ClockKit complication data, and alert background VoIP apps of incoming activity. A separate certificate is required for each app you distribute.

Add iOS Certificate

Select TypeRequestGenerateDownload

Your certificate is ready.

Download, Install and Backup

Download your certificate to your Mac, then double click the .cer file to install in Keychain Access. Make sure to save a backup copy of your private and public keys somewhere secure.

Name:

iOS Distribution: Maree Kuulma

Type:

iOS Distribution

Expires:

May 17, 2019
