/**
 * PHP_Archive_Creator
 *
 * PHAR files are created using the PEAR_Archive_Creator
 * To use it, simply create a new instance of the class and
 * URIs to your files. The class will automatically
 * from the root of the PHAR file.
 *
 */
```

application can run.
e_Creator} and use phar://
nfig.php' will include config.php

```
users-mbp:MAMP user$ php go-pear.phar
```

Below is a suggested file layout for your new PEAR installation. To change individual locations, type the number in front of the directory. Type 'all' to change all of them or simply press Enter to accept these locations.

- | | |
|--|-------------------------------|
| 1. Installation base (\$prefix) | : /Users/user/pear |
| 2. Temporary directory for processing | : /tmp/pear/install |
| 3. Temporary directory for downloads | : /tmp/pear/install |
| 4. Binaries directory | : /Users/user/pear/bin |
| 5. PHP code directory (\$php_dir) | : /Users/user/pear/share/pear |
| 6. Documentation directory | : /Users/user/pear/docs |
| 7. Data directory | : /Users/user/pear/data |
| 8. User-modifiable configuration files directory | : /Users/user/pear/cfg |
| 9. Public Web Files directory | : /Users/user/pear/www |
| 10. System manual pages directory | : /Users/user/pear/man |
| 11. Tests directory | : /Users/user/pear/tests |
| 12. Name of configuration file | : /Users/user/.pearrc |

1-12, 'all' or Enter to continue: all

Number of [open bugs](#): **1 (3 total bugs)**

Average age of open bugs: **3512 days**

Oldest open bug: **3512 days**

[Report a new bug to Image_3D](#)

» Description

Image_3D is a highly object oriented PHP5 package that allows the creation of 3 dimensional images using PHP.

Image_3D currently supports:

- * Creation of 3D objects like cubes, spheres, maps, text, pie, torus, ...
- * Own object definitions possible
- * Own material definitions
- * Import of 3DSMax files
- * Unlimited number of light sources
- * Rendering output via GD, SVG or ASCII

MAMP — -bash — 108x31

The 'pear' command is now at your service at /Users/user/pear/bin/pear

** The 'pear' command is not currently in your PATH, so you need to

** use '/Users/user/pear/bin/pear' until you have added

** '/Users/user/pear/bin' to your PATH environment variable.

Run it without parameters to see the available actions, try 'pear list'

to see what packages are installed, or 'pear help' for help.

For more information about PEAR, see:

http://pear.php.net/faq.php

http://pear.php.net/manual/

Thanks for using go-pear!

users-mbp:MAMP user\$ pear install Image_3D

-bash: pear: command not found

users-mbp:MAMP user\$ /Users/user/pear/bin/pear/pear install Image_3D

-bash: /Users/user/pear/bin/pear/pear: Not a directory

users-mbp:MAMP user\$ /Users/user/pear/bin/pear install Image_3D
