Prevent this page from creating additional dialogs.

OK Cancel

www.rjmprogramming.com.au says: ✕

Enter Places Name (note, here, suffix of |TimeZoneName|GMTOffset|TimeNow is recognized in the onclick select event prompt window later ... for example Sydney|Australia/Sydney|+11|12:32 uses this functionality) 1

Prevent this page from creating additional dialogs.

www.rjmprogramming.com.au says:

Enter decimal Latitude,Longitude 1 (for no more hit Cancel button and append with

, "A tooltip and clicking link for Google Map of Sydney|Sydney/Australia|+11|12:50"

or maybe perhaps

, "A tooltip and clicking link for Google Map based on latitude and longitude of Sydney|Sydney/Australia|+11|12:50"

optionally (as (just) two examples of what is possible with HTML included (activates with onclick bit not onmouseover))

Prevent this page from creating additional dialogs.

OK Cancel
