Device security

Security that comes built into your device.

Standard hardware security not supported

Your device does not meet the requirements for standard hardware security. Devices have different hardware built in that Windows uses to provide additional protection.

[Learn more](#)

Device performance & health

Check that your Windows is up-to-date and if there are any issues impacting your device health. The Health report shows the status of the most recent scan.

No issues
- ✓ Apps and software
No issues

Fresh start

Start fresh with a clean and up-to-date installation of Windows. This will keep your personal files and some Windows settings, and remove some of your apps.

In some cases, this may improve your device's startup and shutdown experience, memory usage, Store apps performance, browsing experience, and battery life.
